

DIGITAL INDUSTRIES SOFTWARE

Teamcenter X Manufacturing

Speed-to-market | Reduce risks | Increase margins

[siemens.com/software](https://www.siemens.com/software)

Challenges in manufacturing

Operate efficiently between disciplines to get products to market faster	Ability to predict issues before they happen to improve product quality	Innovate to win in markets

Possibilities that lead to success

Seamless collaboration	Issue prevention	Process improvement
Collaboration between OEM and supply chain in manufacturing	Issue prevention on the shop floor and manufacturing environment	Manufacturing process improvement and innovation

Modern PLM for instant-on value

Teamcenter X is Teamcenter on the cloud, operated by Siemens			
Increase reliability	Reduce overhead	Lower costs	Global access

Teamcenter X manufacturing

Speed-to-market	Reduce risk	Increase margins
Accelerate tasks across manufacturing disciplines with improved supplier collaboration	Anticipate assembly and factory issues before they happen	Achieve continuous manufacturing process improvement and innovation
• Easy-to-use and preconfigured with best practices • Secure collaboration with suppliers and across disciplines • Fast deployment to start quickly and realize ROI	• Integrated manufacturing planning applications • Solutions for predicting outcomes early • Greater visibility into manufacturing processes and data	• Siemens-driven operations, maintenance and upgrades • Allows you to focus on and address business and innovation • Future-ready, open platform to address today's and tomorrow's opportunities
