

Why ISO 9001 and ISO 27001 Certification Matters:

in your Software Vendor and Integrator Experience

THE CHALLENGE

In today's fast-evolving business landscape, organizations are increasingly relying on integrated digital solutions to improve operational efficiency, ensure compliance, and safeguard critical information. However, ensuring that these solutions meet the highest standards of quality management and data security remains a significant challenge. Many organizations struggle to find reliable software providers who can align with both their quality and security standards, creating gaps that can lead to inefficiencies, vulnerabilities, and regulatory risks. .

THE OPPORTUNITY

ISO 9001 and ISO 27001 certifications provide a clear benchmark for quality management systems and information security management. When you partner with a software and services provider certified in both standards, you unlock several key benefits that directly contribute to operational resilience and competitive advantage.

ISO 9001 ensures that the provider follows a well-established framework for delivering consistent, high-quality products and services. This helps you optimize

processes, reduce errors, and maintain compliance across your operations. ISO 27001, on the other hand, focuses on maintaining the confidentiality, integrity, and availability of your information assets, ensuring robust protection against ever-evolving cybersecurity threats.

By leveraging a certified provider, your organization can minimize operational risks, improve data security, and achieve smoother regulatory audits—while fostering trust with your clients, partners, and regulators.

OUR SOLUTION

At Connected Manufacturing™, we are proud to be certified under both ISO 9001 and ISO 27001 standards. These certifications represent our unwavering commitment to delivering world-class software solutions and services with a focus on quality and information security. Our proven track record spans multiple industries, including manufacturing, life sciences, and electronics, and semiconductor, where quality management and data protection are critical.

By partnering with Connected Manufacturing™, you benefit from:

Higher Quality Assurance:

Our ISO 9001-compliant processes ensure that every solution is built to meet stringent quality standards, resulting in fewer defects, improved customer satisfaction, and a higher return on investment.

Enhanced Security Compliance:

Our ISO 27001 certification guarantees that we apply the best practices in information security, protecting your sensitive data from threats and ensuring a framework for compliance with regulatory requirements such as GDPR, HIPAA, and others.

Seamless Integration & Faster Deployment:

Leveraging our expertise, we ensure your solutions are implemented efficiently and customized to meet your specific business needs, reducing time-to-market and ensuring continuous improvement.

What Connected Manufacturing™ Technology?

Smarter

Connected Manufacturing™ team comprises experts from diverse industries, ensuring that we deeply understand the challenges you face. Our solutions are tailored to your unique requirements, providing a seamless and efficient transition to an ISO-certified software environment.

Faster

With decades of experience, Connected Manufacturing™ has mastered the art of rapid implementation while maintaining strict adherence to quality and security

standards. This means faster project completion, quicker regulatory compliance, and more efficient audits.

Better Results

Partnering with an ISO 9001 and ISO 27001 certified provider like Connected Manufacturing™ ensures your organization gets the best possible results. You benefit from higher quality, reduced risks, and comprehensive data security, allowing you to focus on innovation and growth.

More Information

For over three decades, Connected Manufacturing™ has been helping manufacturers across multiple industries to transform design and production processes, accelerate time-to-market, and ensure traceability across supply chains. Our expertise in Manufacturing Execution Systems (MES), Product Lifecycle Management (PLM), Industrial Internet of Things (IIoT) and advanced AI-driven analytics empowers you to overcome complex challenges to achieve true design for manufacturability and a closed-loop production process. Ready to take your manufacturing operations to the next level? Contact us today.

ABOUT CONNECTED MANUFACTURING™

At Connected Manufacturing™, we enable manufacturers to thrive in digital world, a requirement today for exceptional results. We specialize in deploying and optimizing advanced Siemens solutions like Opcenter MES, Teamcenter PLM, Insights Hub IoT, as well as offering the latest Industrial AI-driven analytics. We integrate your design and innovation with your execution processes through digital threads to help you continuously optimize your operations. We do so by fusing together the solutions into a seamless experience that your teams want to use and need to be successful. From medical devices and pharmaceuticals to semiconductors and electronics, our solutions deliver real-time insights to tune your output and actionable intelligence to drive smarter decisions and deliver real operational excellence.
